Dear future students! Perhaps right at this moment you will make a final decision to enter our university. And it will be the right choice. With its glorious past, remarkable present and brilliant future, MEPhI is one of the most prestigious and significant universities in Russia. **Today MEPhI** is a Russian national research and educational center with branches in all the regions, where our main partner and ally, Russian Federation national nuclear corporation “Rosatom” is represented. **MEPhI’s name is associated with the highest quality education.** Our University is known for a unique approach to education, which combines fundamental education in physics and mathematics with comprehensive engineering training as well as the fact that we actively involve students into scientific research. Studying in MEPhI means becoming a true expert and succeeding in life!

*Best regards, Mikhail Strikhanov,
Rector of the National Research
Nuclear University MEPhI,
www.mephi.ru*

MEPhI is one of the best national universities which educates elite experts for the science-based sectors of the Russian Federation economy. It includes prominent science schools and more than 200 educational programs.

Judging by the results of the work, one can say with complete and absolute certainty that the experts of your university are world leaders in the wide range of fields.

VLADIMIR
VLADIMIROVICH
PUTIN 22.01.2014,
MEPHI

PROMISING EDUCATIONAL DIRECTIONS

Physics of atomic nuclei and elementary particles, nanotechnologies and nanomaterials, radiation and beam technologies, superconductivity and controlled thermonuclear fusion, intelligent computer systems, nuclear medicine and medical physics, all of these are far from being a complete list of advanced directions of study for the students, who are engaged both in practical and research activities.

Equally important in the work of the University is the training of managers, analytical experts, who monitor and audit technological and industrial sectors of Russian and world economies. The University also trains specialists in the sphere of management, nuclear law and international science and technology cooperation.

MISSION

To generate, disseminate, use and preserve scientific knowledge aiming to address global challenges of the XXI century as well as to provide innovative transformations in Russia accompanying development of the country competitiveness in the global energy and non-energy high-tech markets.

UNIQUE ADVANTAGES

- The most promising and modern educational programs
- Module education, individualization of education.
- MEPhI's unique experimental facilities and centers.
- 13 students development bureaus.
- Internationally accredited educational programs.
- Internships in the leading research centers and laboratories.

All the educational activity of MEPhI is based on three key notions: **education, science and innovation**. The unity of the three is ensured within the framework of scientific research. And if the first and second year students can choose to participate in research, starting with the 3-rd year scientific research is included into the curriculum. Senior students, master degree students and postgraduate students are actively engaged in the scientific research carried out by laboratories, departments and scientific centers of the University.

HIGHEST QUALITY EDUCATION

Module education and flexible educational trajectories are the basis of the educational process in MEPhI. Students individual work plays an important role in the process. Individualization of the educational

process, applying project and distance methods, interdisciplinary knowledge help students feel confident in the labour market and adapt to its demands. The credit-module system, implemented in MEPhI, allows providing high quality education.

MEPhI graduates get official transcripts of diploma in international form, and students participate in the international academic mobility programs and “double degree” program.

All the educational programs, realized in the University comply completely with the international educational standards and are internationally accredited.

WORLD LEVEL SCIENCE RESEARCH

MEPhI is one of the first universities in Russia, whose students can have internships and practices, prepare graduation projects in the leading science centers of the world.

Switzerland

- Large Hadron Collider (experiments ATLAS, ALICE, CMS, NSW, SHIP, NA61/ SHINE (CERN)).

USA

- Experiments STAR, PHENIX, LZ, COHERENT.

Germany

- FAIR— Facility for Antiproton and Ion Research, XFEL (DESY), HADES (CSI).

Japan

- BELLE, KEK, T2K.

France

- ITER – International Thermonuclear Experimental Reactor

Italy

- ICECUBE, PAMELA.

Russia

- NICA — Nuclotron-based Ion Collider facility
- PIK reactor – Research nuclear neutronic reactor
- MARS— Multiturn Accelerator-Recuperator Source of synchrotron radiation.
- PEARL — petawatt laser complex
- VEPP-2000— electron-positron collider

INTERNATIONAL RANKINGS 2015/2016

MEPhI is the first and only university among all the participants of Russian academic excellence project, which became one of the TOP-100 world universities according to two international ranking agencies — THE and QS.

MEPhI was awarded with the Order of the Red Banner of Labour

MEPhI was founded during the Second World War in 1942 and made a great contribution to the national victory. It was named Moscow Mechanics Institute of Ammunitions. Its original purpose was to train specialists for military and nuclear programs of the USSR.

In 2008 MEPhI was reorganized and renamed as the Federal State Budgetary Educational Institution of Higher Professional Education “National Research Nuclear University (MEPhI).” Educational institutions under the competence of the Ministry of Education and Science of the Russian Federation and “Rosatom” in cities with the nuclear enterprises were affiliated to MEPhI.

Great scientists and outstanding statesmen were among the founders of MEPhI: I.V. Kurchatov, B. L. Vannikov, Y. B. Zel'dovich, N.N. Semenov, A. I. Leipunskii and many others.

INSTITUTE OF NUCLEAR PHYSICS AND ENGINEERING

+7 (495) 788-56-99, ext. 8127

FEDERAL STATE AUTONOMOUS EDUCATIONAL
INSTITUTION
OF HIGHER EDUCATION
"NATIONAL RESEARCH NUCLEAR UNIVERSITY"
(MEPhI)

OBJECTIVE - to achieve global leadership in education, science and innovation in the field of fundamental problems of matter structure and nuclear materials and technologies, which contribute to definition of directions of future energy resources research and exploration for the mankind. Training of specialists, capable of meeting global challenges of today's nuclear sphere which range from fundamental problems of matter structure and new materials development to creation of a new nuclear energy platform.

GENERAL INFORMATION

Institute is engaged in scientific research and innovation activities, in training of the specialists for research in the fields of physics of matter structure, cosmophysics, directed at search of new states of matter and energy sources, as well as engineering and technical and innovation activities in the sphere of nuclear technologies, new materials development, nuclear power plants improvement. Institute's advantage is in active collaborations with the leading international nuclear centers and participation in megaprojects together with the scientific institutes of the Russian academy of science and state corporations "Rosatom", "Roscosmos", "Rostec".

Students are offered international educational programs in two languages, accredited according to the international standards, including programs, realized together with the European universities, MEPhI partners, members of the European Nuclear Education Network ENEN. The graduates receive two diplomas: one of MEPhI and diploma of Master of Science in Nuclear Engineering (MSNE) ENEN.

BACHELOR'S PROGRAMS

Code	Direction of training
14.03.01	Nuclear Power Engineering and Thermophysics
14.03.02	Nuclear Physics and Technologies
22.03.01	Materials Science Engineering

SPECIALIST'S PROGRAMS

14.05.01	Nuclear Reactors and Materials
14.05.02	Nuclear Power Plants: Design, Operation and Engineering
14.05.04	Electronics and Automation of Physics Installations

MASTER'S PROGRAMS

03.04.02	Physics
14.04.01	Nuclear Power Engineering and Thermophysics
14.04.02	Nuclear Physics and Engineering
22.04.01	Materials Science Engineering

POSTGRADUATE PROGRAMS

03.06.01	Physics and Astronomy
09.06.01	Computer Science and Engineering
13.06.01	Electric and Thermal Engineering
14.06.01	Nuclear, Thermal and Renewable Power Generation and Associated Technologies
16.06.01	Physical and Engineering Sciences and Technologies
18.06.01	Chemical Technology
22.06.01	Technology of Materials
24.06.01	Aerospace Engineering
27.06.01	Control of Engineering Systems

DEPARTMENTS

1	Department of Radiation Physics and Safety of Nuclear Technologies
2	Department of Automation
5	Department of Theoretical and Experimental Physics of Nuclear Reactors
7	Department of Experimental Nuclear Physics and Cosmophysics
9	Department of Materials Science
11	Department of Experimental Methods of Nuclear Physics
13	Department of Thermophysics
40	Department of Elementary Particle Physics
60	Department of Physics of Extreme States of Matter
89	Department of Technology of Closed Nuclear Fuel Cycle
91	Department of Computer and Engineering Design

TECHNOLOGICAL POTENTIAL

- Unique scientific facility NEVOD (registration of cosmic rays muons)
- MEPhI Nuclear reactor
- Complex of analytical simulators of nuclear power plants
- Devices for material analysis on the atomic level
- Installations for consolidation of materials
- Subcritical testing units and devices for measurement and control of nuclear materials
- Experimental nuclear physics laboratory, where a neutrino detector of new generation RED-100 was created

INTERNATIONAL RESEARCH AND EDUCATION (R&E) CENTERS AND LABORATORIES

- Nonproliferation of nuclear materials centers and laboratories
- Complex modeling of nuclear power plants
- Nuclear fuel and constructive materials
- Complex support of radiation safety of facilities using nuclear energy
- Management and safe exploitation of nuclear power plant
- Physics of nuclear reactors and technologies of closed nuclear fuel cycle
- Thermophysics of nuclear power plants
- Advanced technologies of new materials development
- Innovative methods of processing and analysis of materials properties
- Preservation and management of nuclear knowledge
- Laboratory of experimental nuclear physics

INTERNATIONAL SCIENTIFIC RESEARCH LABORATORIES

- Advanced technologies of new materials development
- Scientific and educational center NEVOD

INSTITUTE FOR LASER AND PLASMA TECHNOLOGIES

+7 (495) 788-56-99, ext. 9113

OBJECTIVE to ensure MEPhI's leading positions in Russia and worldwide in the priority directions in the sphere of environmentally safe energetics, energy-efficient technologies, new materials on the basis of development and convergence of laser, plasma, beam, synchrotron and X-ray technologies by integrating educational, scientific research and engineering and innovative activity of the university.

GENERAL INFORMATION

The institute unites MEPhI departments and key departments of Prokhorov General Physics Institute (Russian Academy of Sciences) and P.N. Lebedev Physical Institute of the Russian Academy of Sciences. The aims of the institute are comprehensive. They include conducting of fundamental and applied research and development of the new plasma, laser, nano and bio technologies. The institute has a developed experimental basis inside the University and is closely connected with the biggest research centers in the world.

Graduates of the institute's departments work in the leading universities and laboratories in different countries as well as the biggest Russian and foreign business companies. The majority of the students publish the results of their works in the leading international physical journals and present them at international conferences even before the defense of their master degree thesis.

14.05.04	Electronics and Automation of Physics Installations
----------	---

MASTER'S PROGRAMS

01.04.02	Applied Mathematics and Informatics
03.04.01	Applied Mathematics and Physics
12.04.05	Laser Technique and Laser Technology
14.04.02	Nuclear Physics and Technologies

POSTGRADUATE PROGRAMS

01.06.01	Mathematics and Mechanics
03.06.01	Physics and Astronomy
16.06.01	Physical and Technological Sciences and Technology

DEPARTMENTS

14	Departments of Electrophysical Installations
21	Departments of Plasma Physics
31	Departments of Applied Mathematics
32	Departments of Theoretical Nuclear Physics
37	Departments of Laser Physics
69	Departments of Physics of Laser Thermonuclear Fusion
70	Department of Physics of Solid State and Nanosystems
88	Department of Physics of Semiconductive Quantum Electronics

TECHNOLOGICAL POTENTIAL

- Automated laser technological complexes in the MEPhI Laser center
- Unique laser facility "International user facility" (launch scheduled for 2017)
- Linear simulator with direct-axis magnetic field with stationary power in plasma flux 50 kw
- Complex of ion beams and plasma research facilities, generating fluxes within the range of 1 to 105 ev (electron volts) and power density up to 10 gigawatt/m²
- Linear electrons accelerators for energy from 2 to 30 MeV, ion sources, neutron generators
- Laboratory of high performance nuclear and physical calculations

INTERNATIONAL RESEARCH AND EDUCATION (R&E) CENTERS

- Advanced laser technologies center
- Experimental laser installation of terawatt power «Laser user facility»
- Advanced laser and beams center

INTERNATIONAL SCIENTIFIC RESEARCH LABORATORIES

- Research of condensed matter and nanostructures with the use of synchrotron radiation and free electron lasers
- Radiation diagnostic methods and radiation technologies with the use of high-intensity laser radiation.
- Energy-efficient surfaces laboratory
- Quantum metrology laboratory
- Modeling of physical processes in extreme light fields
- Impulse process laboratory

INSTITUTE OF ENGINEERING PHYSICS FOR BIOMEDICINE

+7 (495) 788-56-99, ext. 8582

OBJECTIVE Development and implementation of new materials, methods and technologies of nanotheranostics and nuclear medicine.

GENERAL INFORMATION

The institute is engaged in interdisciplinary research in the field of synthesis of nuclear medicine technologies and nanotechnologies for biomedicine. New technologies and devices, including radiopharmaceuticals, for dangerous diseases diagnostics and therapy are being developed. New high-efficiency methods of computer nanomedicine are being created.

Students are involved in scientific research and contribute to the solution of the important national economy problems, participate in inventive and rationalization activity.

- Nanoparticles generation laser complex for biomedicine
- High tech complexes for cancers diagnostics and therapy, "cleanrooms" complex
- MEPhI Nuclear reactor

INTERNATIONAL RESEARCH AND EDUCATIONAL (R&E) CENTERS

- Nuclear medicine center

INTERNATIONAL SCIENTIFIC AND RESEARCH LABORATORIES

- Nanobioengineering laboratory
- Nanobiophotonics laboratory

INSTITUTE FOR NANOENGINEERING IN ELECTRONICS, SPINTRONICS AND PHOTONICS

+7 (495) 788-56-99, ext. 8092

OBJECTIVE The status of a global leader in education, science and innovations in the field of the development of nanomaterials and nanosystems for nanoelectronics, microwave nanoelectronics, organic electronics, nano-biomedical engineering, nanomechanics, intelligent nanomaterials, materials for nuclear and space application, and composite materials.

GENERAL INFORMATION

The institute gives its students a unique opportunity to become a professional possessing both elaborated theoretical knowledge and expertise in contemporary methods of research and production, and design of complex functional devices on the intersection of science and technology. Unique laboratories allow the students to master advanced methods of the development and research of nanosystems, devices in the field of non-silicon electronics, starting with a material and ending up with an instrument or a functional system. The key areas of the research in the institute are focused on electronics based on new physical principles; spintronics; organic electronics; quantum electronics; TeraHertz technologies and systems (including: plasmonics, radio-photonics);

adaptive systems; nanofluidics and soft matter; new wideband-gap and hybrid materials, and devices combining the advantages of dissimilar functional materials (GaN, SiC) for power devices and etc. The Institute cooperates closely with the leading Russian industrial enterprises and research institutions, belonging to Roselectronics JSC, SC Rosatom, The Russian Academy of Sciences. Our graduates are well acquainted with the challenges of modern science and technology, they possess practical skills of working with up-to-date research and production equipment, thus obtain a high level training, required on a global level.

BACHELOR'S PROGRAMS

POSTGRADUATE PROGRAMS

03.06.01	Physics and Astronomy
11.06.01	Electronics, Radio Engineering and Communications Systems

DEPARTMENTS

3	Department of Electronics
10	Department of Molecular Physics
27	Department of Micro- and Nanoelectronics
67	Department of Condensed Matter Physics
78	Department of Physical and Technical Problems of Metrology
81	Department of Physics of Micro- and Nanosystems

TECHNOLOGICAL POTENTIAL

- Nanotechnology Education and Research Center is a research and engineering complex of ISO 6 - ISO 8 cleanrooms for the developments in the field of microwave and power electronics. The center has both production facilities and unique measurement equipment.
- New Wideband-gap Semiconductors and Solid State Components on Their Basis Education and Research Center is a joint center of cooperation with the JSC State Plant Pulsar. The center brings together the plant's and institute's developments in the field of latest electronic devices
- Heterostructure Microwave Electronics and Physics of Wide Band-gap Semiconductors Education and Research Center
- Engineering Center (system engineering и commercialization of projects)

SCIENTIFIC RESEARCH LABORATORIES

- Laboratory of advanced equipment and microwave electronics technology based on 2D nanostructures
- Laboratory of ion-cluster technology
- Laboratory of hybrid nanosystems and composites
- Extreme Fluid Dynamics Laboratory

INSTITUTE OF CYBER INTELLIGENCE SYSTEMS

+7 (499) 324-84-46

FEDERAL STATE AUTONOMOUS EDUCATIONAL
INSTITUTION
OF HIGHER EDUCATION
"NATIONAL RESEARCH NUCLEAR UNIVERSITY"
(MEPhI)

OBJECTIVE Training of personnel able to withstand modern threats and challenges, with expertise and competence in the field of cybernetics, information and financial security essential for meeting the challenges of basic software development, for improving the security the security of critical information systems and combating the financing of terrorism and money laundering.

GENERAL INFORMATION

Institute is engaged in research and innovative development in the field of cybernetics, information and financial security. The advantages of the Institute are: training of the personnel with relevant competences in the field of cybernetics, information and financial security for professional problem solving in sphere of building secure information systems and software development; techniques of proactive cyber defense, including principles of construction of intelligent cyber security agents adapting to the rapidly changing environment of intellectual and high secure distributed infrastructures of data storage and processing, increasing the rate of reaction to

cyber threats and the effectiveness of detection of illegal financial transactions; involvement in research in the field of robotics and cyber physical systems.

Institute has 4 small innovative enterprises. Main areas of graduates employment: public service, banking, finance, audit, IT sphere, information security.

BACHELOR'S PROGRAMS

43	Department of Strategic Research in Information Technology
44	Department of Information Security of Banking Systems
65	Department of Analysis of Competitive Systems
75	Department of Financial Monitoring

TECHNOLOGICAL POTENTIAL

- Supercomputer "Basov"
- Supercomputer "Tcherenkov"
- 20 modern IT rooms for students' training
- 5 specialized laboratories in information security
- 6 student research engineering centers with high efficiency scientific equipment
- Educational manufacturing facility: small scale production of high technology products with automated operating system
- Laboratory testing facility from National Instruments based on LabView hardware-in-the-loop for studying the principles of electronic devices
- Laboratory testing facilities for studying the processes of add-ins based on microcontrollers
- 3 clusters for studying the methods of concurrent programming and building of high load systems
- Laboratory facilities for studying web-based telecommunications technologies based on CISCO equipment

INTERNATIONAL SCIENTIFIC AND RESEARCH LABORATORIES

- Hybrid supercomputer technologies
- Robotic engineering
- Neurotechnology and cognitive architecture
- Intelligent systems and technology
- Software engineering and information support of the development and manufacture of scientific products and technologies
- Fundamental principles of information technology
- Centre of high performance computing
- Cyber security of scientific and education facilities of informational support
- Certification of informational support facilities in accordance with the information security demands

INSTITUTE OF FINANCIAL AND ECONOMIC SECURITY

+7 (499) 324-03-78

FEDERAL STATE AUTONOMOUS EDUCATIONAL
INSTITUTION
OF HIGHER EDUCATION
"NATIONAL RESEARCH NUCLEAR UNIVERSITY"
(MEPHI)

OBJECTIVE Preparation of highly qualified specialists in the field of financial monitoring, information and economic security, economics, audit and national law based on the integration of theory and practice, academic mobility of students, advanced educational technologies to solve the problems of the financial and economic security of the Russian Federation and of the partner countries in the international anti-money laundering system.

GENERAL INFORMATION

Institute – is the first and so far the world's only institution of higher education for training experts to address the financial problems monitoring in the form of a complete educational cycle: basic higher education; Master Degree; Post Graduate Programs; advance training. The advantage of the institute is a comprehensive training with advanced knowledge and competencies in the field of cybernetics, information and financial security to solve the problems of counteraction to money laundering, the protection of critical facilities, capable of withstanding modern threats and challenges. Institute graduates can find application of their knowledge: in government agencies, law enforcement

agencies (the Ministry of Finance, the Central Bank of the Russian Federation, Rosfinmonitoring, etc.); commercial banks, leasing companies, insurance companies, etc; in the financial intelligence units of the country - member of the Eurasian group; in the IT-companies ("FORS "Technoserv", "CROC", etc.); in consulting the firms (PriceWaterhouseCoopers, Ernst & Young and others); in the international organization (FATE, World Bank, "Egmont" Group).

+7 (495) 788-56-99, EXT. 9583

FEDERAL STATE AUTONOMOUS EDUCATIONAL
INSTITUTION
OF HIGHER EDUCATION
"NATIONAL RESEARCH NUCLEAR UNIVERSITY"
(MEPhI)

GENERAL INFORMATION The Institute was established in 1999 for the human resourcing of federal agencies: the Ministry of Foreign Affairs, the Ministry of Education and Science, Ministry of Economic Development, the State Corporation "Rosatom" State Corporation "Roskosmos", OJSC "Rosoboronexport" and other government institutions, research institutes of the RAS system, Russian missions abroad. The curriculum was created with the support of Academician Ye.M. Primakov and Academician A.V. Torkunov. The Institute prepares analysts, managers, professionals of IT and PR technologies for the human resourcing of the international activities of the Russian Federation. The Institute implemented a unique interdisciplinary curriculum that combines basic scientific training and humanitarian educational modules on International Relations and on the special linguistic training. Students undertake training in foreign universities and research centers.

FEDERAL STATE AUTONOMOUS EDUCATIONAL
INSTITUTION
OF HIGHER EDUCATION
"NATIONAL RESEARCH NUCLEAR UNIVERSITY"
(MEPhI)

OBJECTIVE Comprehensive training
in the field of high technologies with the assistance
of the innovation potential of the first Science City for
enterprises and organizations of nuclear power, science,
technology and nuclear medicine.

GENERAL INFORMATION

Institute for Nuclear Power
Engineering (INPE) is located in
the city of Obninsk. The Institute
implemented the concept of
multilevel training of specialists
with higher education.

Today the institute trains students
in 5 specialties,
bachelors in 19 directions, masters
in 16, post-graduate students in 12
specialties. The main directions of
scientific
research are:

- physical and technical problems
of nuclear technology and nuclear
energy;
- reliability and safety of nuclear
energy and industry;
- construction of mathematical
models of different processes and
systems, of living systems;

- studying environmental issues
related to the functioning of
the nuclear fuel cycle and other
industrial facilities;
- study of the effects of ionizing
and non-ionizing radiation of
different quality on biological
objects of different degrees of
difficulty;
- conventional and nuclear
medicine;
- preclinical testing of
radiopharmaceuticals, radiation
protectors

FACULTY FOR PHYSICS AND TECHNOLOGY

+7 (495) 788-56-99, ext. 9790

FEDERAL STATE AUTONOMOUS EDUCATIONAL
INSTITUTION
OF HIGHER EDUCATION
"NATIONAL RESEARCH NUCLEAR UNIVERSITY"
(MEPhI)

GENERAL INFORMATION The faculty carries out educational activities in close connection with the research, technology and innovation activities. The basis of the educational process of the faculty is the combination of fundamental physical and mathematical training and provision of superior engineering skill of graduates on the basis of the application of the best global practices and international standards of engineering education.

The advantage of studying at the faculty is a chance from the very beginning of one's student life to become a member of or to organise a team of young leaders, engineers of the future; by receiving fundamental training in physics and mathematics, to master a wide range of disciplines (new materials, computer-aided design and engineering, electronics and micro-processors, analog and digital signal processing, data transmission systems, programming languages

and operating systems); to contribute to the development of new technical solutions in the priority areas of scientific and technological progress; by submerging into the world of high technology and engineering science, to discover one's talents and the ability to obtain unique competence of highly skilled engineer-physicist, able to create together with the like-minded people the future world which one desires to live in.

FACULTY FOR BUSINESS INFORMATICS AND INTEGRATED SYSTEM MANAGEMENT

+7 (495) 788-56-99, ext. 9734

GENERAL INFORMATION The Faculty provides training under the bachelor, master and postgraduate programs. Scientific innovation work and development of scientific complex projects on "mesoeconomics" in cooperation with academic institutions of the RAS: the Central Economic Mathematical Institute (CEMI) and the Institute of Economic Forecasting (IEF RAS), creation of business models of innovative development of "Meso-economic" systems - large corporations and territorial complexes (priority development areas - PDA) are under way.

Unique advantages of studying at the faculty are associated with the outstanding Russian scientists, professors of the Faculty. Academician of Russian Academy of Sciences, Director of the IEF RAS V.V. Ivanter, corresponding members of the Russian Academy of Sciences G.B. Kleiner, B.N. Porfiriev,

D.E. Sorokin and many others. They are the "golden fund" of education complex of the Faculty and at the same time represent a powerful research center, providing research and development at the advanced level.

My name is Blessed Raphotle – a first year Master’s student at the Department of Theoretical and Experimental Physics of Nuclear Reactors in MEPhI. I feel highly esteemed and privileged to study at one of the world’s leading research universities, especially in the field of nuclear technology. The atmosphere of learning in MEPhI is of a high standard, engaging, and inviting towards acquiring more knowledge. The ease with which students interact with each other and with the staff is profound and dignified. In general, I find Russians to be welcoming, willing to lend a hand, and proud of their heritage. I have been to numerous places in and around Moscow and beyond it, and witnessed what a beautiful country Russia is, as well as its citizens. In all my encounters, I was constantly reminded of the importance of self-awareness and holding true to one’s identity, due to the rich historical monuments around the country, how important events are commemorated and most importantly the ability to convey values and ideals from one generation to the other. My journey has not yet ended, and I am sure to discover more about this beautiful country, and the life-lessons learnt here; I will take them back with me to South Africa upon completion of my studies, in the hope of inspiring a set of values and ideals towards a productive society. For now, my studies are my priority.

BLESSED RAPHOTLE

I’m proud of being a student of MEPhI, which is a prestigious unique university of excellent education, innovation and wisdom. There is an abundance of opportunities, intelligence along with a smooth path of study. It’s a wonderful center of acquiring knowledge. It has a long glorious history of creativity. MEPhI is the nucleus of nuclear science and technology. That’s why our first and foremost choice is the MEPhI.

HAGUE MOHAMMAD REZAUL

MEPhI is a top university in Russia. I am a foreign student, who comes from Vietnam. I am one of many international students who are studying at this university. MEPhI has modern equipment and large dormitories, so I think you will enjoy a comfortable living environment when you live there. In addition, if you worry about your knowledge, MEPhI will help you because we have highly qualified teachers and a diverse system of libraries. This is a university where you can find and make your dream come true in the future. Welcome to MEPhI University.

MASTER'S PROGRAMS

GENERAL INFORMATION The University trains candidates for Master's degree for Russia and foreign countries in the most important areas of fundamental and applied sciences and modern technology: nanotechnology and nanomaterials, radiation and beam technologies, superconductivity and controlled thermonuclear fusion, nuclear medicine and medical physics, biophysics and ecology, information security, etc.

Graduates of MEPhI bachelor's and specialist's degrees programs are trained in the University along with the students graduated from other universities of Russia and from abroad. Students can undergo study courses in the leading scientific centers and laboratories around the world, participate in programs of international academic mobility

and "double degree". Graduates receive official transcript of international standard. There are more than 60 master's degree programs in MEPhI implemented by the departments, members of institutes and faculties.

IMPLEMENTATION OF MASTER'S PROGRAMS AT THE HIGHER SCHOOL FOR PHYSICISTS NAMED AFTER N.G. BASOV. The Higher School for Physicists named after N.G. Basov (HSP) trains candidates for Master's degree and carries out the Pre-Master's training for Bachelors in special educational programs for the elite engineering and physics training of Physics and Mathematics, Physics and Technology, Information profiles for advanced directions in scientific research and science-based high-tech industries. HSP implements programs of academic mobility in cooperation with leading foreign education and research centers, as well as joint master's programs in cooperation with universities of the CIS countries and far abroad.

SCIENTIFIC DIRECTOR OF HIGHER SCHOOL FOR PHYSICISTS NAMED AFTER N.G. BASOV, DR. SCI. IN PHYSICS AND MATHEMATICS, ACADEMICIAN OF THE RUSSIAN ACADEMY OF SCIENCES, OLEG N. KROKHIN.

POSTGRADUATE STUDY

GENERAL INFORMATION Postgraduate study at MEPhI provides the training of highly qualified scientific and academic staff in 20 direction of training: Nuclear, Thermal and Renewable Energy and Related Technology; Physics and Astronomy; Photonics, Instrumentation, Optical and Biotechnical Systems and Technologies; Information Security; Electronics, Radio Engineering and Communication Systems; Technical systems control; Computer Science and Engineering; Economics and others

Admission to postgraduate study of academic staff is based on applications from candidates and entrance examination results. Postgraduates can undertake training programs at leading scientific centers and laboratories and participate in programs of international academic mobility. During the training every postgraduate student is engaged in both research work and teaching. A postgraduate diploma of the state standard is awarded upon

graduation and the qualification of "Researcher. Academic Specialist" is conferred. Postgraduates, who successfully defended their candidate theses, are provided with the opportunity to get a MEPhI Ph.D. degree.

EDUCATION AT THE LEVEL OF INTERNATIONAL STANDARDS

MEPhI has been officially recognized as a member of the Worldwide CDIO initiative (www.cdio.org) aimed at modernization of engineering education in higher education.

Modernization and development of engineering curricula have been implemented in compliance with the CDIO standards requirements.

Having met the CDIO standards MEPhI is on par with leading world universities such as Stanford University, Massachusetts Institute of Technology, California State University, United States Naval Academy, Tsinghua University (Asia Region), Chalmers University of Technology (Europe Region), etc.

INTERNATIONAL ACCREDITATION OF ENGINEERING EDUCATIONAL PROGRAMS

EUROPEAN FEDERATION OF NATIONAL ENGINEERING ORGANIZATIONS

FEDERATION EUROPEENNE D'ASSOCIATIONS NATIONALES D'INGENIEURS, FEANI

14 MEPhI engineering educational programs are part of Index programs, the quality of which corresponds to “European standards” (FEANI Index). 12 educational programs have been accredited by FEANI for inclusion into FEANI Index.

The University educational programs inclusion into FEANI Index gives MEPhI graduates, who have been taught in accordance with these educational programs, a chance to get the qualification of EUR ING (European Engineer) — a specialist whose qualification is recognized by all EU countries and corresponds to international requirements.

ACCESS TO GLOBAL OPEN EDUCATIONAL COURSES

The university widely uses leading open educational courses.

COURSERA is an international educational platform. It is one of the most massive open online courses MOOC*. Over 13 million students are users and over 2 million courses are offered.

EDX is an international educational platform. It is one of the most prestigious open online courses MOOC*. Its founders are Harvard University and Massachusetts Institute of Technology.

Cyber Learning Platform for Nuclear Education and Training. An educational platform for specialized education in the field of nuclear technologies developed, implemented and supported by International Atomic Energy Agency (IAEA). The only platform in Russia has been established in MEPhI.

* MOOC: Massive open online courses — training courses using interactive learning and application of e-training technologies.

CAREER AND EMPLOYMENT

ADMISSION DATES AND DEADLINES IN THE
2016/2017 ACADEMIC YEAR

STUDENT LIFE Student life is not only end-of-term assignments and exams. It opens up the possibility to make incredible breakthroughs, to implement ingenious ideas, to make unique discoveries! To make dreams come true the Associated Student Body (ASB), established in MEPHI, strives to help students. The ASB is composed of the best student representatives and for four years in a row, it gains a victory in the Contest of Development Programs for student associations' activity organized by the Ministry of Education and Science of the Russian Federation.

Research and innovation activities, students' self-government, creative teams, construction teams, volunteer movement, participation in sports, the opportunity to try out the role of a journalist, a TV or radio-presenter — the University creates all favorable conditions for strengthening creative potential of students. *Have you already made a choice?*

- Dormitory Council
- Volunteer movement "Good Works service"
- Volunteers team «Anzer»
- Construction teams
- Young teachers team
- Ecological Association «ECO-MEPHI»
- Student Television «Gamma-TV»
- Student Radio «Impulse»
- Editorial team of the website MEPHISTUDENT
- International Friendship Club "MEPHI Unity"
- Students Scientific Society (SSS)
- Youth Engineering Center
- Club "What? Where? When?"
- Debates Club

- Patriotic Club "Allegiance"
- Historic Reenactment Club "VIRM»
- Club «Design Laboratory»
- Center for cultural projects
- League of KVN
- Academic Male Choir
- Students Song Club (SSC)
- Chamber Choir CarpeDiem
- Vocal Studio QuantodiStella
- Poetry Club
- Dance Group "ESTA"
- Rock-Laboratory
- Team of Dramatic Sketches "Studio D.T.P."
- Student Theater of Pop Sketches
- "Eighth Creative Association (ECA)

SPORTS Studying at MEPHI is not only learning complex subjects. But it is also a great opportunity to take up sports. There is a choice of about 30 various sports clubs from athletics, martial arts, rugby, hockey, football, volleyball to aerobics&fitness, climbing, sailing and badminton.
Can't decide what to choose or do you want to try yourself as a sports manager?

MEPhI Center for Physical Education and Sports and Students Sports Club “Reactor” will be eager to provide you with all necessary assistance.

All conditions have been created for physical training and sports in MEPHI. The university has games and gymnastics halls, two sambo halls, a hall for table tennis, two outdoor tennis courts with artificial turf, a gym, as well as outdoor plane constructions.

The Sports Facilities of MEPHI hold a series of traditional competitions. These include International Tournament on Sambo for the “Prize of Space Conquerors”, ski competitions “Race of Generations”, athletics cross “Kolomenskie Hills”, Festival of Sports Aerobics, Spartakiad on Basketball, Volleyball, Sambo, Rugby

among Universities of Moscow and Kids City Competitions on Sambo. Sports life gives a chance to MEPHI students to become participants of the Moscow City Student Games, regional tournaments, student national championships, international competitions of the highest rank, the winners of which have repeatedly been the athletes of our university.

NON-RESIDENT APPLICANTS

MEPhI offers non-resident applicants and students comfortable hotels and dormitory in Moscow, Obninsk and other towns where regional branches of the University are located.

The number of places in the dormitories which are available for admission of the first year students in 2016:

Name of branch	Number of Places
NRNU MEPhI (Moscow)	700
BITI MEPhI (Balakovo)	100
VITI MEPhI (Volgodonsk)	150
DITI MEPhI (Dmitrovgrad)	320
INPE MEPhI (Obninsk)	450
MOPK MEPhI (Elektrostal)	50
NVPK MEPhI (Novovoronezh)	35
OTI MEPhI (Ozersk)	30
SarPhTI MEPhI (Sarov)	32
STI MEPhI (Seversk)	91
SPK MEPhI (Novosibirsk)	90
TTI MEPhI (Trekhgornyy)	70
UralTC MEPhI (Zarechnyy)	150

MEPhI SCHOLARSHIPS

in academic year 2015/2016

ACADEMIC SCHOLARSHIPS are awarded to students based on superior academic performance, creative activity, sports achievements, research work, participation in university events as a volunteer.

INDIVIDUAL SCHOLARSHIPS are awarded to students for inventions, participation in scientific conferences, scientific publications, outstanding achievements in Olympiads, significant contributions to the development of their industry

SOCIAL SCHOLARSHIPS

CAREER AND EMPLOYMENT

ROSATOM State Atomic Energy Corporation

Ministry of Defence of The Russian Federation

Roscosmos State Corporation For Space Activities

National Research Center "Kurchatov Institute"

Russian Academy of Sciences

Russian Federal Nuclear Center

Federal Financial Monitoring Service

Ministry of Foreign Affairs of the Russian Federation

Foreign Intelligence Service of the Russian Federation

International Atomic Energy Agency (IAEA)

CERN—European Organization for Nuclear Research

European Synchrotron Radiation Facility (ESRF)

Federal Environmental, Industrial and Nuclear Supervision Service

Federal Security Service of the Russian Federation

Federal Service for Technical and Export Control (FSTEC Russia)

N.L. Dukhov all-Russia Research Institute of Automatics

State Scientific Center RF "Troitsk Institute of Innovative and Thermonuclear Research"

Federal Service for Military-Technical Cooperation (Russia)

Ministry of Education and Science of the Russian Federation

Ministry of Internal Affairs of the Russian Federation

Intel Corporation — an American corporation, that manufactures a wide range of electronic devices and computer components

Siemens — Transnational Industrial Concern (group of companies)

Microsoft Corporation — one of the largest transnational companies in the production of proprietary software for all kinds of computers

Central Bank of the Russian Federation

СБЕРБАНК

Sberbank of Russia PJSC

Gazprom PJSC

"Kaspersky Lab" — a Russian company specializing in the development of protective systems against computer viruses, spam, hacker attacks and other cyber threats

"Yandex" - a Russian IT-company, which owns the eponymous search engine on the web and internet portal

"ICC Milandr" JSC - a Russian company - developer and producer of microelectronic components based on the use in products with high demands of reliability

Oil Company Rosneft OJSC

+300
largest high technology companies

ADMISSION DATES AND DEADLINES IN ACADEMIC YEAR 2016/2017

<p>The beginning of the application period for admission of documents for Bachelor's Degree and Specialist's Degree programs.</p> <p>15 June</p>	<p>The application deadline for admission of documents for Bachelor's Degree and Specialist's Degree programs from persons entering on the results of additional entrance examinations of creative and (or) a professional character.</p> <p>8 July</p>	<p>The application deadline for admission of documents for Bachelor's Degree and Specialist's Degree programs from persons entering on the results of other entrance examinations conducted by MEPhI on its own.</p> <p>11 July</p>	<p>The deadline for entrance examinations conducted by MEPhI on its own.</p> <p>The application deadline for admission of documents for Bachelor's Degree and Specialist's Degree programs from persons entering without passing entrance examinations conducted by MEPhI on its own.</p> <p>26 July</p>	<p>The beginning of the application period for admission of documents for Master's Degree programs.</p> <p>18 April</p> <p>The application deadline for agreement to admission from persons entering without entrance examinations; entering the place within quota if these persons have applied at the same time for admission to the two or more higher education institutions.</p> <p>28 July</p>	<p>The application deadline for admission of documents for Master's Degree programs.</p> <p>10 August</p> <p>The application deadline for agreement to admission from persons, included in the lists of applicants to the main competitive places and wishing to be enrolled at the first stage of admission to the main competitive places.</p> <p>Within each list of applicants, there are persons, who are singled out, applied for agreement to admission before 80% of the main competitive places are filled (with rounding-off).</p> <p>1 August</p>	<p>The deadline for entrance examinations for Master's Degree programs.</p> <p>15 August</p> <p>The application deadline for agreement to admission from persons, included in the lists of applicants to the main competitive places.</p> <p>Within each list of applicants, there are persons, who are singled out, applied for agreement to admission before 100% of the main competitive places are filled.</p> <p>6 August</p>
<p>27 July</p> <p>Lists of applicants are available on the official website.</p>				<p>29 July</p> <p>Issuance of an order (orders) for admission of persons who submitted agreement to admission, from the number of applicants entering without entrance examinations, who enters within quota.</p>	<p>3 August</p> <p>Issuance of an order (orders) for admission of persons who submitted agreement to admission, before 80% of the main competitive places are filled.</p>	<p>8 August</p> <p>Issuance of an order (orders) for admission of persons who submitted agreement to admission, before 100% of the main competitive places are filled.</p>
